01 / YOUR LIGHT AT A GLANCE

Caelen Crystal-Effect Ceiling Light

Caelen Ceiling places clear decorative prisms inside a curved black metal cage close to the ceiling. A short neck connects the cage to its round ceiling rose; this version has no hanging flex, and uses one replaceable E27 LED bulb.

BODY DIAMETER
18.5 cm

BODY HEIGHT
17 cm

CEILING ROSE DIAMETER
10 cm

FINISH
Black with clear decorative prisms

LIGHT SOURCE
One E27 LED bulb included

Check the short-neck ceiling version in Black. The 17 cm figure describes the body; measure the complete fitting when assessing overhead clearance.

Black metal cage

Curved metal members form the outer frame around the bulb; support the metal body without pressing inward on the decorations.

Clear decorative prisms

The upright faceted details sit within the frame and catch the light; protect them from impact, pressure and cleaning-tool snags.

Neck and ceiling rose

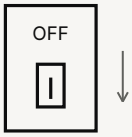

A short neck connects the cage to a round ceiling rose, distinguishing this close-fitting version from the cable-hung pendant.

Allow for the complete ceiling profile

Check the ceiling point against the 18.5 cm cage width and nearby doors or cupboards. Measure from the ceiling to the lowest part of the received fitting, including its ceiling rose and neck. Choose a position where the prisms cannot be knocked during normal movement or when furniture is moved beneath them.

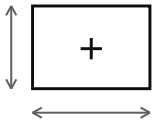

CAELEN CRYSTAL-EFFECT CEILING LIGHT

Prepare & fit

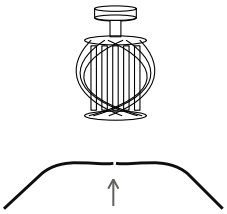

Before fitting

Switch off the lighting circuit at the consumer unit and verify it is dead. Electrical connections and testing must be completed by a competent installer. Keep the light supported until it is securely fixed.

01 Check the position

02 Support the body

03 Check before use

Keep prisms away from tools

Unpack onto a padded surface and inspect each visible prism for damage. If any decorative pieces arrive loose, keep them separately cushioned and retain all packaging while their placement is checked.

Identify the supplied bulb

Keep the included E27 LED bulb and its packaging together. Have the installer confirm its rating and clearance within the cage before use, without assuming that any larger E27 bulb will fit.

1 Confirm the ceiling version

Check that the fitting has its short neck and ceiling rose. Plan the mounting point from this actual body and its dimensions rather than a pendant photograph or a different finish.

2 Support the metal frame

Lift by the substantial metal body with pressure kept off the prisms. Keep the cage supported while the installer examines the mounting parts and checks the suitability of the ceiling.

3 Protect decorative details during work

Keep the cage away from the ladder and tools as it is raised. Check any loose decorative piece before fitting proceeds; do not improvise a clip, bend a support or glue a prism.

4 Inspect around the bulb

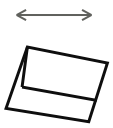

Before use, confirm that the cage and decorative pieces are stable and the bulb is clear of them. Check from all sides without pulling on a prism to test its attachment.

CAELEN CRYSTAL-EFFECT CEILING LIGHT

Use & look after

One included E27 LED bulb

Caelen Ceiling uses one replaceable E27 LED bulb and is supplied as non-dimmable. Keep the bulb's details for later replacement, checking the actual fitting's limits and available space. Allow the light to cool before any handling, and use the bulb-access method established for the delivered cage without disturbing the decorative prisms.

Dust each prism gently

With the light off and cool, wipe accessible prism surfaces using a soft, dry cloth. Do not pull them or snag their ends.

Protect the black frame

Dust the metalwork separately, using light pressure. Avoid abrasive polish, solvent cleaners and sprays that could collect around the bulb or decorative attachments.

If something needs attention

A prism is damaged or loose	Keep the fitting off and photograph the affected area for LUNARIA. Do not remove neighbouring prisms, bend retainers or add glue as a repair.
The bulb sits against the cage	Switch off and let it cool. Have the installer check bulb size and seating; do not spread the frame or displace decorative pieces for clearance.
The whole fitting moves	Leave the light off and arrange a mounting check. Keep the area below clear and do not use the decorative cage to tighten the ceiling rose.

BEFORE SWITCHING ON

- ✓ Fitting secure
- ✓ Fragile parts stable
- ✓ No trapped cable
- ✓ Electrical checks complete
