Calder Ring LED Chandelier

Product specification

Illustrative outline. Dimensions are stated values; drawing is not to scale.

DESCRIPTION

Calder is a ring chandelier hung level on three fine wires from a round ceiling plate. The ring is a plain metal band above a band of clear faceted acrylic, with an integrated LED that offers three whites, selected at the wall switch. One diameter is offered, in Black, White or Gold, with the ceiling plate in the same finish.

The drop is adjustable; the figure is measured from the ceiling to the underside of the ring.

Every finish has the same three whites; black, white and gold describe the fitting, not its light.
