# Crystal-Effect Cylinder Art Deco Wall Light

Round 14 cm

Illustrative outline. Dimensions are stated values; drawing is not to scale.

## DESCRIPTION

A faceted acrylic cylinder sits on a metal wall fitting, giving this light its crystal-effect appearance. The round shade is 14 cm wide and the fitting stands 24 cm high. Satin Gold and Matte Black finishes are available. It takes a replaceable E27 bulb, which is not included.

The crystal-like faceting is formed in acrylic, not glass crystal.
