01 / YOUR LIGHT AT A GLANCE

Modern Iron Dome Pendant Light

This pendant pairs a painted iron dome with a smaller bowl beneath it. The two-part profile directs attention to the light below the shade, and both painted surfaces need protection while the fitting is unpacked and positioned.

FORM
Upper dome with lower bowl

SHADE MATERIAL
Painted iron

COLOUR CHOICE
Eight current colours

LIGHT SOURCE
Replaceable E27 bulb

SUSPENSION
Cord pendant

Current colours are White, Black, Grey, Blue, Yellow, Pink, Red and Dark green. Check the delivered finish in daylight, especially when arranging a matching pair.

Upper dome

The broad painted shade forms the main silhouette. Protect its curved surface from tools, hard edges and rubbing against neighbouring parts.

Lower bowl

The smaller painted bowl sits below the dome. Treat it as a separate delicate feature, never as the pendant's carrying handle.

Suspension cord

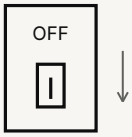

The cord runs above the shade towards the ceiling. Keep it loose and untangled while the body rests on the padded surface.

Measure the complete dome profile

Use the full upper-dome width when planning the pendant's position, then check the lowest point of the lower bowl. View the intended height from seated and standing positions. For a pair, mark both centres and measure the finished bottoms from a common surface before the installer adjusts the suspension.

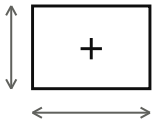

MODERN IRON DOME PENDANT LIGHT

Prepare & fit

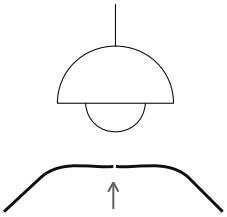

Before fitting

Switch off the lighting circuit at the consumer unit and verify it is dead. Electrical connections and testing must be completed by a competent installer. Keep the light supported until it is securely fixed.

01 Check the position

02 Support the body

03 Check before use

Keep the painted pieces apart

Place any separately packed shade sections on a soft cloth with a gap between them. Do not stack the lower bowl inside the dome where their finished surfaces could rub.

Check the lower bowl

Inspect the bowl and dome for dents, chipped paint or damaged edges. Keep any supplied small parts together so the installer can identify their purpose before positioning the bowl.

1 Confirm the ceiling support

Assess the ceiling point and the delivered mounting parts. Agree the pendant centre and finished lowest point before the fitting is raised or its suspension length is set.

2 Identify the bowl attachment

Identify the actual lower-bowl support and retention on the delivered fitting while it is accessible. Keep the bowl supported during this check; do not assume it merely rests in position.

3 Check the bulb fit

Match the E27 bulb to the holder marking and the available space inside the dome. Avoid forcing the lower bowl around a bulb that does not fit comfortably.

4 Inspect the two-part outline

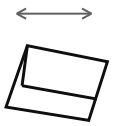

After fitting, view the dome and bowl from the side. Ask the installer to check any uneven spacing or loose lower piece before use; do not try to centre it by twisting the bowl.

MODERN IRON DOME PENDANT LIGHT

Use & look after

Replace the bulb with care

This pendant uses a replaceable E27 bulb. Match the actual holder limits and the space above the lower bowl when selecting a replacement. Switch off and let the bulb cool first. Keep the installer's demonstrated bowl-access method with this guide so future maintenance does not strain the painted parts.

Preserve the painted finish

Dust the cool dome with a soft, dry cloth. Avoid metal polish, abrasive pads and strong cleaners, even when the paint has a glossy appearance.

Support the lower piece

Use gentle strokes on accessible bowl surfaces without twisting or pulling it. Do not remove a retaining part solely to reach a patch of dust.

If something needs attention

The lower bowl appears uneven	Leave the light off and photograph the gap around the bowl. Ask the installer to inspect its retention; do not bend any support to level it.
A replacement bulb touches the bowl	Stop before reassembling or switching on. Check the bulb's size and holder limits with the installer; do not enlarge the gap by forcing the metal.
The painted shade has a mark	Try gentle dusting with a dry cloth once cool. If the mark remains, contact LUNARIA before using polish or rubbing compound on the finish.

BEFORE SWITCHING ON

- ✓ Fitting secure
- ✓ Fragile parts stable
- ✓ No trapped cable
- ✓ Electrical checks complete
