01 / YOUR LIGHT AT A GLANCE

Natural Stone Round Pendant

This pendant combines a round yellow travertine shade with a wood sphere above it. Natural differences in the stone's surface make careful inspection and gentle handling useful before the pendant is raised into its final position.

SHADE SIZES
15 cm, 20 cm or 30 cm

STONE OPTION
Yellow Travertine

SHADE MATERIAL
Natural stone

UPPER DETAIL
Wood sphere

FORM
Suspended round shade

Check the ordered diameter against the delivered stone shade. When fitting several together, compare their natural tone and surface pattern before deciding the order along the ceiling.

Travertine shade

The broad stone disc forms the visible shade. Its edges need protection from tools, worktop corners and knocks during lifting.

Wood sphere

The rounded wood detail sits above the stone and contributes to the profile. Do not use it as a carrying handle.

Suspension line

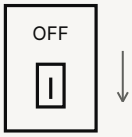

The line above the shade connects the hanging assembly to the ceiling area. Keep it free from knots and sharp bends.

Plan around the stone shade

Measure the diameter of the delivered shade and mark its intended centre over the bedside, table or worktop. Check the lowest point from both seated and standing positions, including the route people take past it. Record the desired finished height for the installer before any suspension adjustment is made.

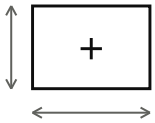

NATURAL STONE ROUND PENDANT

Prepare & fit

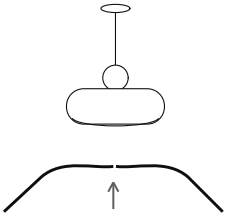

Before fitting

Switch off the lighting circuit at the consumer unit and verify it is dead. Electrical connections and testing must be completed by a competent installer. Keep the light supported until it is securely fixed.

01 Check the position

02 Support the body

03 Check before use

Make a padded landing place

Clear a stable surface large enough for the stone shade and cover it with a clean, soft cloth. Keep metal fittings and tools in a separate tray so they cannot scratch the stone.

Separate variation from damage

Look over the shade in good light, especially its outer edge. Natural surface markings may vary; a fresh crack, detached piece or damaged suspension needs attention before the fitting is raised.

1 Confirm the support

Assess the ceiling and the actual weight of the delivered assembly before selecting fixings. The stone needs suitable structural support; shade diameter alone does not determine the required ceiling attachment.

2 Agree the finished height

Give the installer the chosen shade position and lowest-point measurement. For a row of pendants, use the same reference surface for every measurement rather than comparing the lengths of loose suspension lines.

3 Support the stone during lifting

Arrange a clear lift with the stone supported from underneath using both hands. Keep the disc away from the ladder and wall, and avoid transferring its weight through the decorative wood sphere.

4 Check the final outline

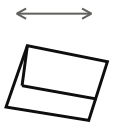

After installation, inspect the shade from two directions. If it sits at an unexpected angle or a crack becomes visible, leave the light off and have the installer examine the suspended assembly.

NATURAL STONE ROUND PENDANT

Use & look after

Keep the stone assembly undisturbed

Have the installer show you the normal control and any user-accessible light-source information on your fitting. Keep that information with this guide for future replacement enquiries. Before maintenance, switch off and allow the light to cool; do not rotate the stone shade to search for access.

Dust the natural stone

Use a soft, dry cloth with gentle strokes. Avoid soaking the shade or using acidic, abrasive or descaling cleaners on the porous stone surface.

Care for the wood detail

Remove dust with a dry cloth without twisting the sphere. Do not apply oil, polish or cleaning spray near the suspension or electrical parts.

If something needs attention

The stone differs from another pendant	Compare both shades in daylight and check their ordered size. Natural tone and pattern can differ; photograph any suspected crack separately for LUNARIA.
The shade hangs unevenly	Leave the light off and ask the installer to check its support and suspension. Do not try to level it by pulling the stone edge.
The light stops working	Check the normal control, then leave the light off. Send LUNARIA the order details and any accessible label information without taking the stone assembly apart.

BEFORE SWITCHING ON

- ✓ Fitting secure
- ✓ Fragile parts stable
- ✓ No trapped cable
- ✓ Electrical checks complete
