01 / YOUR LIGHT AT A GLANCE

Nolen Coloured Glass Ceiling Light

Nolen is a shallow coloured-glass ceiling light with an open centre and compact round ceiling plate. The bulb is visible beneath the bowl, making both its physical size and its light colour part of the finished appearance.

SHADE DIAMETER
25 cm

CEILING PLATE
10 cm diameter

COLOURS
Orange, Green, Brown, White

LIGHT SOURCE
One E27 LED bulb

BULB
Not included

Match the glass colour to your order while the light is off. Keep the glass and its own supplied metal components together.

Glass bowl

The shallow coloured bowl surrounds the central opening; its rim needs protection from knocks, pressure and contact with hard tools.

Round ceiling plate

The compact metal ceiling plate sits above the bowl at the ceiling and forms the visible top of the assembled fitting.

Central lamp opening

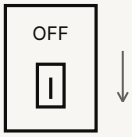

The open underside leaves the fitted bulb visible below the glass; check the bulb envelope without pressing against the rim.

Check the bowl and the visible bulb

Mark the intended centre, then check the 25 cm shade against nearby cornices, cupboard doors and the room's walking route. Allow for the bulb beneath the open centre when checking the completed height. Use the actual fitting and chosen bulb for this check rather than judging clearance from a photograph.

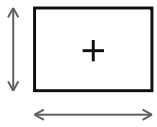

NOLEN COLOURED GLASS CEILING LIGHT

Prepare & fit

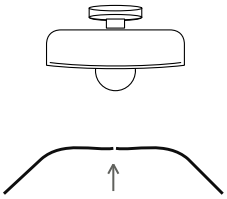

Before fitting

Switch off the lighting circuit at the consumer unit and verify it is dead. Electrical connections and testing must be completed by a competent installer. Keep the light supported until it is securely fixed.

01 Check the position

02 Support the body

03 Check before use

Inspect the glass in good light

Place the fitting on clean padding and examine the glass for chips or cracks, including around the opening. Keep the glass clear of screwdrivers, loose screws and packaging staples during preparation.

Choose a compatible bulb

Prepare one E27 LED bulb. Check its rating and physical dimensions against the actual fitting, including the open centre; an E27 base alone does not guarantee a suitable bulb size.

1 Agree the ceiling centre

Check the ceiling plate position against the electrical point and intended room layout. Assess the ceiling support and the actual supplied mounting parts before any fixing holes are marked or drilled.

2 Keep glass loads off the rim

Support the glass and metal body together while moving the assembled fitting. Do not suspend its weight from the edge of the glass, the opening or a partially fitted bulb.

3 Protect the bowl during ceiling work

Keep the fitting cushioned until it is ready to be lifted. If the glass needs to be separated, use the supplied product's confirmed arrangement; do not turn the bowl to guess its release method.

4 Check the completed profile

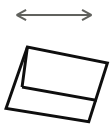

Once the fitting has been secured, check that the bowl is stable and free of pressure points. Confirm the bulb sits clear of the glass and that the planned overhead clearance is maintained.

NOLEN COLOURED GLASS CEILING LIGHT

Use & look after

Use the specified bulb format

Nolen takes one E27 LED bulb, supplied separately. The selected bulb affects the warmth and brightness seen through the coloured glass. Use an ordinary on/off arrangement; this fitting is not offered as dimmable. When replacing a bulb, switch off, let it cool and follow the access method established during fitting.

Clean the coloured glass gently

Dust the cool glass with a soft, dry cloth, supporting the body as needed. Avoid pressing hard on the rim or central opening.

Protect the metal finish

Use a separate soft cloth on the ceiling plate. Keep abrasive cleaners and direct sprays away from the metalwork and the opening around the bulb.

If something needs attention

The glass looks different when lit	Compare it in daylight with the light off. The bulb's colour and brightness change the appearance through the glass; check the bulb before changing the fitting.
The bulb touches the glass	Switch off and let the bulb cool. Have the installer check a smaller compatible bulb envelope; do not force the bulb or reposition the glass by pressure.
The bowl moves or has a crack	Leave the light off and contact LUNARIA or the installer. Do not tighten the glass itself or attempt to conceal a crack with adhesive.

BEFORE SWITCHING ON

- ✓ Fitting secure
- ✓ Fragile parts stable
- ✓ No trapped cable
- ✓ Electrical checks complete
