Nolen Coloured Glass Ceiling Light

Product specification

Illustrative outline. Dimensions are stated values; drawing is not to scale.

DESCRIPTION

Nolen combines a shallow coloured-glass bowl with a compact round ceiling plate. Its open underside leaves the central E27 bulb visible beneath the shade. Orange, Green, Brown and White glass options share the same 25 cm diameter; the bulb is selected separately and is not included.

The bulb remains visible beneath the open centre; its shape and light colour affect the finished appearance.
