01 / YOUR LIGHT AT A GLANCE

Rowan Wave LED Pendant Light

Rowan Wave is a pendant made from one painted metal ribbon, looped into a wave and hung on two fine wires from a matching ceiling rose. The LED light strip is built into the ribbon, so there is no separate bulb to fit.

SIZE OPTIONS
24 cm or 30 cm wide

COLOURS
Black, White or Gold

BODY
Painted metal ribbon

LIGHT SOURCE
Built-in LED strip

SUSPENSION
Two fine wires, adjustable up to 80 cm

FORM
Looped wave pendant

Check the width and finish against your order before fitting. The ceiling rose is finished to match the ribbon, and every finish has the same built-in LED with three white tones.

Looped ribbon

One continuous band of painted metal forms both loops. Lift it by the band itself, with two hands, rather than by the wires.

Light strip

One face of the ribbon is the light strip, which spreads the LED light. Keep tools, tape and sharp edges away from it.

Wires and ceiling rose

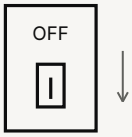

Two fine wires and a slim power flex run from the ribbon to the round ceiling rose. Keep them straight and free of kinks.

Set the height for the space below

Decide where the lowest point of the ribbon should sit before the light goes up. In a hallway or on a landing, keep it high enough for the tallest person in the house to walk beneath it. Over a table it can hang lower, up to the full 80 cm. Check the view from the main doorway as well.

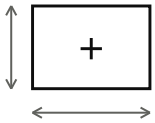

ROWAN WAVE LED PENDANT LIGHT

Prepare & fit

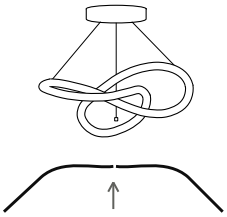

Before fitting

Switch off the lighting circuit at the consumer unit and verify it is dead. Electrical connections and testing must be completed by a competent installer. Keep the light supported until it is securely fixed.

01 Check the position

02 Support the body

03 Check before use

Unpack onto a soft surface

Lay the ribbon on a clean cloth and let the wires fall loosely beside it. Check the ribbon, the light strip and the ceiling rose for marks or dents before anything is fitted.

Agree the finished height

Measure from the ceiling to where the bottom of the ribbon should hang and note the figure for whoever fits the light. Once both wires are set, check that the ribbon hangs level.

1 Check the ceiling point

Compare the ceiling rose and any mounting parts received with the existing ceiling point and the support behind it. The rose should sit flat against the ceiling once fitted.

2 Keep the ribbon supported

Have a second person hold the ribbon while the ceiling rose is fixed and connected, so its weight never hangs from the flex or from a single wire.

3 Set the two wires

Identify how the wires on your light lock and adjust before raising it. Bring both wires to the agreed height a little at a time, keeping the ribbon supported until both are secure.

4 Check it hangs level

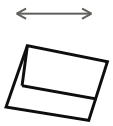

Step back and view the ribbon from the doorway. If one side sits lower, support the ribbon again and correct that wire rather than pulling the ribbon into place.

ROWAN WAVE LED PENDANT LIGHT

Use & look after

Built-in LED, three white tones

Rowan Wave has a built-in LED strip, so there is no separate bulb to buy or replace. It gives three white tones: warm, neutral and cool. Have the installer demonstrate how a tone is selected on your light, and keep that information with this guide. The light is not dimmable; do not connect it to a dimmer switch.

Dust the ribbon

With the light off and cool, wipe the painted metal with a soft, dry cloth. Support the ribbon with your other hand so the wires are not pulled.

Keep the light strip clean

Wipe the light strip gently with a dry microfibre cloth. Do not use sprays, solvents or abrasive pads, and do not hang anything from the ribbon.

If something needs attention

The ribbon hangs unevenly	Switch off, support the ribbon and compare the two wires. Have the lower side corrected at its wire; do not bend the ribbon to level it.
The white tone is not the one expected	Check any operating information received with your light and the demonstration given at fitting. Avoid switching rapidly on and off to guess a sequence.
Part of the strip stays dark	Switch the light off and note which section is affected. Contact LUNARIA with a photo; do not open the strip or the ceiling rose to look for a bulb.

BEFORE SWITCHING ON

- ✓ Fitting secure
- ✓ Fragile parts stable
- ✓ No trapped cable
- ✓ Electrical checks complete
