01 / YOUR LIGHT AT A GLANCE

Senra Braided Bamboo Pendant Light

Senra has a shallow, asymmetric bamboo weave suspended on black flex. Its curved outline and open mesh let light pass around and through the shade; the bulb is chosen separately, so its appearance also affects the finished result.

SHADE WIDTH
38 cm

SHADE HEIGHT
13 cm

FLEX
120 cm, black

LIGHT SOURCE
Bulb not included

FORM
Open, asymmetric weave

Match the 38 cm shade and black flex to your order. Measure the actual shade before choosing its final position.

Woven shade

Fine crossing bamboo strips form the open surface, allowing light to pass through the mesh as well as the lower opening.

Curved edge

The continuous wavy edge defines the asymmetric outline; protect it from pressure so the weave keeps its intended shape.

Black flex

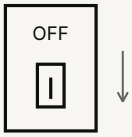

The visible black flex runs above the shade; keep it untwisted and supported while the fitting is being prepared.

Plan around the whole curve

Mark the intended centre above your table or furniture, then check the full 38 cm width from the main approach to the room. Allow for the raised and lowered sides of the asymmetric shade. Measure the final ceiling-to-bottom distance separately: the 120 cm flex measurement is not the complete installed drop.

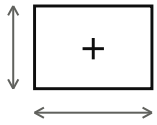

SENRA BRAIDED BAMBOO PENDANT LIGHT

Prepare & fit

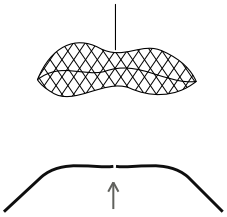

Before fitting

Switch off the lighting circuit at the consumer unit and verify it is dead. Electrical connections and testing must be completed by a competent installer. Keep the light supported until it is securely fixed.

01 Check the position

02 Support the body

03 Check before use

Give the weave room

Clear a padded surface wider than the shade. Remove wrapping gently, looking for crushed strips or splits, and keep small loose items separate so they cannot snag in the open mesh.

Prepare the bulb choice

A bulb is not included. Before buying one, check the holder, permitted bulb rating and physical clearance on the actual fitting; all three matter when choosing a suitable replacement.

1 Set out the ceiling position

Use your furniture layout to agree the ceiling centre and intended shade height. Check the walking route and any opening cupboard or door before marking the proposed position on the ceiling.

2 Support the shade evenly

Carry the shade with both hands spread beneath the body. Keep fingers and tools out of the weave, and avoid lifting the whole pendant by a single strand or its outer edge.

3 Agree the finished drop

Use the supplied fitting's own adjustment arrangement to set the agreed drop during installation. Keep the shade supported throughout, then compare its bottom edge with your planned position before the installation is completed.

4 Check the bulb envelope

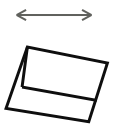

With the fitting off and cool, check the compatible bulb sits without pressing against the weave. Look around the full opening to confirm it is clear of the shade and no packaging remains.

Use & look after

The bulb shapes the result

Senra is supplied without a bulb. A compatible bulb's colour, brightness and shape influence both the light through the weave and the pattern around it. Keep the bulb specification recorded after fitting so replacements can be matched. Any proposed dimmer should be checked against the complete fitting and bulb by the installer.

Clean between the strands

With the light off and cool, use a soft, dry brush to lift dust from the weave. Work lightly without pulling individual strips.

Keep the shade dry

Avoid soaking, steam and spray cleaners on the bamboo. Support the shade while cleaning so pressure from the brush cannot distort its curved edge.

If something needs attention

The light pattern differs from the photograph	Check your bulb's shape and light colour. Distance to nearby surfaces changes the pattern; do not bend the weave to reproduce a photograph.
A strand is split or the shade is crushed	Leave the fitting unused and photograph the affected area for LUNARIA. Do not glue, cut or force the weave back into shape.
The pendant hangs unevenly	Distinguish the intended wavy outline from a leaning suspension. If the suspension leans or moves, keep the light off and ask the installer to check it.

BEFORE SWITCHING ON

- ✓ Fitting secure
- ✓ Fragile parts stable
- ✓ No trapped cable
- ✓ Electrical checks complete
