Tarin Black Tube Pendant Light

Product specification

Illustrative outline. Dimensions are stated values; drawing is not to scale.

DESCRIPTION

Tarin is a single black metal tube suspended from a slim cable and a small round ceiling canopy. The 30 cm tube directs white light downwards from its lower opening. An LED light source is included, while the supplied cable measures 150 cm separately from the light body.

The 150 cm cable measurement excludes the tube and is not the total installed drop.
